### NAICS in the new century

*by Gerald Hiles, Research Analyst, Research and Analysis Bureau, Workforce Services Division, Montana Department of Labor and Industry*

An improved system of classifying industries for the purpose of gathering employment and wage data is "going live" in Montana.

The Standard Industrial Classification (SIC) system of coding industries is being officially retired in Montana, making way for the new North American Industry Classification (NAICS) coding system.

The big advantage to NAICS (pronounced "nakes"), is that a single concept defines industries, and resulting industry groupings and categories will be better suited for economic analysis—as well as for measuring and comparing the economies of North America.

#### Why the change?

The Standard Industrial Classification system has not been able to keep pace with new industries, technologies and services. First used in the 1930s, it underwent several revisions (new SIC manuals were published in 1972 and 1987), but the pace of the changes increased in the 1990s, and in 1991 the United States began considering issues that needed to be addressed to construct a new system. In 1994, a *Federal Register* notice solicited comments on changing the classification system and developing the North American Industry Classification System in cooperation with North American Free Trade Agreement (NAFTA) trading partners Canada and Mexico.

It was decided that the new system would be production oriented rather than product oriented—and that it would be able to adapt for emerging industries, service industries and industries engaged in advanced technologies.

#### Advantages to NAICS classification system

Like SIC, NAICS is hierarchal and applied to the business establishment level. However, NAICS has 11 more industry sectors than the SIC system—and uses a six-digit industry code rather than a four-digit. The first five digits of the NAICS code are common to America, Canada and Mexico. The sixth digit is for each country to use in tracking industries of national concern.

An industry in NAICS is comprised of establishments using the same production processes. For example, software publishing is a new NAICS industry within the new information sector (*see Table B on page 3*).

(continued on next page)

Software is grouped in the same subsector as periodical publishers, newspaper publishers, etc., as all are engaged in issuing copies of work for which they possess copyright for sale to the general public in various formats including traditional print, CD-ROM or online. Under SIC, software publishers were grouped with various establishments engaged in data processing services, computer programming services, software reproduction and other computer related services.

The NAICS system views establishments on the basis of production- or supply-based activities, as opposed to the SIC system's mixture of production and marketing (de-

*A single concept defines the industries within NAICS, and resulting industry groupings and categories will be better suited for economic analysis.*

mand-based) activities. NAICS industries are classified on the basis of their production or supply function, therefore establishments using similar raw materials, capital equipment and labor are classified

within the same industry. This creates homogeneous categories that are better suited for economic analysis.

For instance, the new management of companies and enterprises (55) industry sector will group all headquarters and regional offices together (see Table A). This will classify management offices of companies as diverse as Northwest Power (electrical distribution), Interstate Brands (Eddy's & Sweetheart bakeries) and Molerway Freight (trucking) into the same industry group. The establishments will all be management offices, even though they will be in support of very different types of activities. In the SIC system, such offices were identified by the overall activity and as an auxiliary corporate office. (This may result in future

**Table A ▼**  
**Comparison of NAICS & SIC structures**

NAICS	SIC
Sector (two-digit)	Division (letter)
Subsector (three-digit)	Major group (two-digit)
Industry group (four-digit)	Industry group (three-digit)
NAICS international industry (five-digit)	Industry (four-digit)
National industry (six-digit)	
NAICS sectors	SIC divisions
11 Agriculture, forestry, fishing & hunting	A Agriculture, forestry & fishing
21 Mining	B Mining
22 Utilities	C Construction
23 Construction	D Manufacturing
31-33 Manufacturing	E Transportation, communications & utilities
42 Wholesale trade	F Wholesale trade
44-45 Retail trade	G Retail trade
48-49 Transportation & warehousing	H Finance, insurance & real estate
51 Information	I Services
52 Finance & insurance	J Public administration
53 Real estate & rental & leasing	K Nonclassifiable establishments
54 Professional, scientific & technical services	
55 Management of companies & enterprises	
56 Administrative & support, waste management & remediation services	
61 Educational services	
62 Health care & social assistance	
71 Arts, entertainment & recreation	
72 Accommodations & food services	
81 Other services (except public administration)	
92 Public administration	
99 Unclassified establishments	

## MONTANA EMPLOYMENT AND LABOR FORCE TRENDS

changes or specialized data extractions for researchers interested in enterprise groups and corporate groups of industries.)

The new industry sectors are more noticeable when comparing the structure of the two systems (*see Table A*):

- NAICS uses the first two digits of the code to identify the industry sector a business establishment should be classified under. There are 21 industry sectors to classify under, compared to 11 SIC industry divisions.
- The third digit identifies subsectors.
- The fourth digit represents an industry group level. For example, the broadcasting and telecommunications subsector (513) of the information sector is comprised of radio and television broadcasting (5131), cable networks and program distribution (5132), and telecommunications (5133) industry groups (*see Table B*).
- Individual industries are identified at the five- and six-digit level of the NAICS system. The fifth digit creates a standard classification system to be used by the three NAFTA trading parties. The sixth digit allows each country to break out more detailed statistics for industries of national importance.

In the U.S., there are 725 industries coded at the five-digit level and 668 industries coded at the six-digit level.

**Table B ▼**  
**NAICS structure for the information sector**

NAICS code	Industry
51	Information
511	Publishing industries
5111	Newspaper, periodical, book & database publishers
51111	Newspaper publishers
51112	Periodical publishers

## Time series breaks

One drawback to the NAICS conversion will be inevitable breaks in time series data considered essential for economic forecasting, seasonal adjustment and trend

analysis—and reconstructing historical data into the new system will be difficult given the number of business births/deaths, activity changes and ownership changes occurring each year. ■

# Economic highlights and employment outlook

## Civilian labor force

Montana's civilian labor force averaged 468,300 the first quarter of 2002—up 9,900 over the quarter, and up 3,400 over the year.

## Employed

The number of Montanans employed during the quarter averaged 442,700—up 5,300 over the quarter, and up 4,000 over the year.

## Unemployed

The number of Montanans unemployed during the quarter averaged 25,700—up 4,700 over the quarter, but down 500 over the year.

The average unemployment rate for the quarter was 5.5 percent—up nine-tenths of a percentage point over the quarter, but down one-tenth of a percentage point over the year. ■

## Quarterly Employment Trends

Quarter	Montana Civilian Labor Force*	MONTANA		Unemployment Rate (Montana)	UNITED STATES Unemployment Rate (U.S.)
		Montanans Employed	Montanans Unemployed		
2002 - 1st	468,300	442,700	25,700	5.5%	6.2%
2001 - 4th	458,400	437,400	21,000	4.6%	5.2%
2001 - 3rd	468,600	450,800	17,800	3.8%	4.8%
2001 - 2nd	469,100	448,800	20,300	4.3%	4.4%
2001 - 1st	464,900	438,700	26,200	5.6%	4.6%

\*Rounded Civilian Labor Force Numbers, 2002 Benchmark (Not Seasonally Adjusted)

## Wage and salary jobs by industry sectors

(NOTE: Numbers may not total due to rounding.)

Total nonagricultural wage and salary employment in Montana averaged 384,800 jobs for the first quarter of 2002—down about 8,000 jobs over the quarter, but up approximately 2,500 jobs over the year.

Mining averaged 5,200 jobs—down 300 jobs over the quarter, but even over the year.

Construction averaged 17,400 jobs—down 3,600 jobs over the quarter, and up only about 100 jobs over the year.

Manufacturing averaged 23,100 jobs—down about 800 jobs over the quarter, and down about 900 jobs over the year. Most of the over-the-year job decline was in primary metals and other nondurable goods.

Transportation, communications & utilities (TCU) averaged 21,400 jobs—down 400 jobs over the quarter and nearly even over the year.

Trade averaged 99,300 jobs—down about 2,300 jobs over the quarter, and down about 200 jobs over the year. Eating and drinking places and food stores experienced over-the-year job declines.

Finance, insurance & real estate (FIRE) averaged 18,200 jobs for the quarter—steady over the quarter, and up about 800 jobs over the year spread across real estate, insurance and finance.

Services averaged 115,300 jobs—even over the quarter, but up about 3,000 over the year. The largest over-the-year increases came in health services, social services,

educational services, and engineering and management services.

Total government averaged 84,900 jobs—down about 700 jobs over the quarter, and down about 200 jobs over the year.

## Average weekly hours and earnings

Average weekly earnings for production workers averaged \$394.64 for the first quarter of 2002—down \$9.71 over the quarter, but up \$13.29 over the year.

Average weekly hours averaged 31.8—down six-tenths of an hour over the quarter, but up one-tenth of an hour over the year.

Average hourly earnings averaged \$12.41 for the quarter—down 7 cents over the quarter, but up 38 cents over the year. ■

# Industry news from around the state

(Gathered primarily from state newspaper reports)

## Agriculture

There were about a thousand fewer farms and ranches in Montana in 2001 than in 2000 according to the Montana Agricultural Statistics Service.

The Bushel 42 Pasta plant owned cooperatively by 227 farmers in North Dakota and eastern Montana has begun producing pasta near Crosby, N.D. In addition to being paid for the durum wheat they supply to the plant, members will receive profit dividends.

## Construction

Montana probably will not get as many federal highway construction dollars in 2003 as previously expected. According to the Montana Department of Transportation, a backward correction was made for fiscal year 2003 federal highway funding because of a downturn in the national economy.

Benefis Healthcare in Great Falls has a number of building projects under way this year—a \$15 million operating room addition, a \$5 million for-profit health club and a \$3.6 million hospice facility.

A Montana Army National Guard armory is being built on the Malmstrom Air Force Base at Great Falls. The \$4.5 million project is expected to be completed in September.

Bozeman's Zoot Enterprises has received loan guarantees from local, state and federal sources to help finance the construction of an \$18 million company campus in the Four Corners area. The company processes instant credit application approvals for financial institutions across the nation.

## Manufacturing

After a 13-month shutdown brought on by high electricity costs, Columbia Falls Aluminum Co. has begun to gradually restart potlines. Most employees will be back at work making aluminum or working on improvement and upgrade projects at the plant.

Jore Corp. has been sold in U.S. Bankruptcy Court proceedings to a Pasco, Wash. company. A Western Mortgage and Realty Co. spokesperson says the Ronan tool accessory manufacturing firm will continue to operate as Jore Corp. It employs almost 300 people.

American Chemet Inc. has announced the acceleration of a \$5.9 million expansion plan announced last year, and has confirmed the expansion will take place in East Helena. It will double the East Helena company's capacity to produce the cuprous oxide used in manufacturing toxin-free paint for boat bottoms that prevents barnacles from attaching.

Helena's Summit Design and Engineering is helping to build the new F-22 Raptor jet fighter for the U.S. Air Force. Working as a subcontractor, Summit is building engine access doors, wing spars and tools for fuselage construction.

Advanced Silicon Materials Inc. (ASiMI) is moving its corporate office from Moses Lake, Wash. to Butte. The move will boost ASiMI employment in Butte from 200 to about 220.

Some of the Falcon Publishing employees who lost their jobs in Helena when Falcon was bought out by Globe Pequot Press of Builford, Conn. have created Riverbend Publishing in Helena.

A&S Tribal Industries in Poplar has purchased \$500,000 in manufacturing equipment, including a computer-controlled lathe and mill, and have formed a new company called A&S Diversified that will allow the tribally-owned firm to seek public and private contracts in addition to defense subcontracts.

Started by four couples in the Bitterroot, Painted Rocks Winery is carving out a niche making mead. The company markets several kinds of honey wines to retail outlets in western Montana.

## Transportation, Communications & Utilities

Montana Power Co. officially became NorthWestern Energy March 12. The name change was made by the company's new owner, Sioux Falls, S.D.-based NorthWestern Corp.

Montana-Dakota Resources subsidiary Centennial Power Co. has purchased the Rocky Mountain Power Ltd. power plant under construction on the old Holly Sugar Co. factory site near Hardin.

Amtrak has discontinued baggage check and shipping services from East Glacier and Wolf Point, citing a need to trim costs.

## Trade

The Billings Heights Kmart store will be closed as part of Kmart's Chapter 11 bankruptcy restructuring. Penske Auto Centers operating out of Kmart's around the country will also be closed, including the Penske Auto Center in Great Falls.

Vann's is closing its appliance and electronics store in Butte, saying it was not making enough profit. Other Montana Vann's stores will remain open.

## Services

The National Institute of Health has approved plans to build a \$66 million bioterrorism research facility on the Rocky Mountain Laboratories campus in Hamilton within the next two years. The Level 4 lab would add about 50-65 jobs to the Hamilton facility, according to an NIH spokesperson.

these industry briefs  
was gathered primarily  
from state newspaper  
reports.*

---

The president of a Honolulu, Hawaii software company says Portlock Software is moving its headquarters to Butte. Shipping products from Butte rather than Hawaii will save money, the Butte native says. The company creates storage management software. Its "Storage Manager" product is affiliated with Novell NetWare.

Forty-four telemarketers employed in Missoula by Teleperformance USA were laid off without notice in January. A spokesperson for the Salt Lake City-based company said the company had to downsize after losing major clients after the Sept. 11, 2001 terrorist attacks.

ILX Lightwave has laid off about 30 more employees. The Bozeman-based high-tech firm builds production equipment for fiber-optic manufacturers.

Missoula's Visual Learning Systems Inc. has developed a software product called Feature Analyst that automatically extracts geographical features from digital images. Its workforce fluctuates between 9 and 13 employees.

Missoula's St. Patrick Hospital has opened a branch of its International Heart Institute in Hamilton's Marcus Daly Hospital. The joint venture by the two hospitals allows Heart Institute patients in the Bitterroot to see a cardiologist, attend pacemaker clinics, etc. closer to home. Cardiac surgery and catheterization will only be done at the institute's Missoula location.

An outpatient surgery center under construction in Billings on the St. Vincent Healthcare campus is a joint project of about 25 physicians and Med-Link Inc., a for-profit company of the Sisters of Charity of Leavenworth Health System. The Yellowstone Surgery Center will have four surgical rooms and two procedure rooms—and be connected to St. Vincent's Yellowstone Medical Center by an underground walkway. ■

THE CONSUMER PRICE INDEX (CPI) IS A MEASURE OF THE AVERAGE CHANGE IN THE PRICES PAID BY URBAN CONSUMERS FOR A FIXED MARKET BASKET OF GOODS AND SERVICES. THE CPI IS CALCULATED MONTHLY FOR TWO POPULATION GROUPS, ONE CONSISTING ONLY OF THE URBAN HOUSEHOLDS WHOSE PRIMARY SOURCE OF INCOME IS DERIVED FROM THE EMPLOYMENT OF WAGE EARNERS AND CLERICAL WORKERS (CPI-W). AS NEW USES WERE DEVELOPED FOR THE CPI IN RECENT YEARS, THE NEED FOR A BROADER AND MORE REPRESENTATIVE INDEX BECAME APPARENT. THE ALL-URBAN CONSUMER INDEX (CPI-U), INTRODUCED IN 1978, IS REPRESENTATIVE OF THE 1982-84 BUYING HABITS OF ABOUT 80% OF THE NONINSTITUTIONAL POPULATION, COMPARED WITH 32% REPRESENTED IN CPI-W.

SOURCE FOR DATA: SEE TECHNICAL NOTE S-6 ON "SOURCES OF DATA" PAGE AT BACK OF THIS PUBLICATION.

Note: The Bureau of Labor Statistics has begun using a new formula for calculating the basic components of the CPI-U and the CPI-W effective with the data starting January 1999.

## Reliability of CES estimates

The relatively large size of the Current Employment Statistics (CES) sample assures a high degree of accuracy. As with all sample-based estimates, however, differences between the CES estimates and benchmarked data may be caused by sampling error, changes in industry classification of businesses, or openings and closings of businesses. Thus, the CES estimates are adjusted each year during the benchmark process (see benchmarking explanation below).

The table below presents the amount and percent revision of nonagricultural wage and salary employment estimates at the most recent benchmark for major industry divisions. (Female workers, production workers, and hours and earnings estimates are not subject to benchmark revisions at the estimating cell level because there is no universe count available. These categories are sample based. The broader grouping may be affected by changes in employment weights as the cells are aggregated during benchmarking.)

**Benchmark evaluation of all employees for major industry divisions  
in Montana (employment in thousands)**

Industry	Final estimate March '01	Benchmark March '01	Amount revised March '01	Percent revised March '01	Sample units March '01	Sample employment March '01	Sample percent of universe
Total nonagricultural	387.4	385.4	-2.0	-0.5%	2,339	146.1	38%
Total private	304.7	299.5	-5.2	-1.7%	2,089	90.9	30%
Goods producing	46.7	46.9	0.2	0.4%	403	17.7	38%
Private service producing	258.0	252.6	-5.4	-2.1%	1,686	79.9	32%

Wholesale	18.5	17.9	-0.6	-3.4%	146	2.8	16%
Retail	82.0	82.0	0.0	0.0%	490	22.6	28%
Finance, insurance & real estate	18.0	17.5	-0.5	-2.9%	145	6.1	35%
Services	117.3	113.5	-3.8	-3.3%	718	37.5	33%
Government	82.7	85.9	3.2	3.7%	250	55.2	64%

## Benchmarking

Data included in this publication reflect the current benchmarks for the nonagricultural wage and salary employment series and the labor force series. The annual tables included in this publication also reflect these benchmarks.

A benchmark is a point of reference from which measurement can be made, or upon which adjustments are based. The two series are estimated differently:

(1) The level of nonagricultural wage and salary employment is based on an estimate of the month-to-month change in an established level of employment. A sample survey of firms of different sizes within each industrial classification is used to measure the amount of change.

The benchmark is a reasonably complete count of the number of all employees in an industry at a specific point in time, and sets the level of employment from which the month-to-month change is measured. The base of the benchmark is the ES-202, which is a complete count of all employees covered by Montana unemployment insurance laws. The ES-202 is adjusted by special surveys to include employees not covered by unemployment insurance laws.

Nonagricultural wage and salary employment estimates are compared to the ES-202 on an annual basis and adjusted accordingly (benchmarked) for estimation errors that may have occurred due to sample error, changes in industrial classification of individual firms, the presence of noncovered employees and the opening or closing of businesses.

(2) Labor force data is derived from a monthly sample of households conducted by the U.S. Census Bureau for the U.S. Department of Labor. Known as the Current Population Survey (CPS), this data is designed to be statistically significant on a monthly basis for the nation. States with small populations, however, do not have a large enough sample to ensure reliability on a monthly basis. This is the main reason for benchmarking the labor force series in Montana.

The labor force series also includes the benchmarked nonagricultural wage and salary employment by industry in its benchmarking process. Revisions to the labor force series is normally limited to the preceding three years. Occasionally, a longer benchmark is warranted. For instance, the 1990-95 labor force series was revised in 1997 to incorporate census data revisions.

If a more detailed explanation of the benchmarking process is needed, please feel free to contact the Research and Analysis Bureau.

## Glossary of terms

1. Civilian Labor Force - the number of persons 16 years and older, defined as employed or unemployed, excluding members of the armed forces.
2. Employed - those persons who work for pay or profit during a week or, as unpaid family workers, work 15 hours or more during a week. Also included as employed are those who, although not working, had some job attachment and were not looking for work, including persons temporarily absent from a job due to illness, bad weather, vacation, or labor dispute, whether or not they were in a pay status during their time off.
3. Unemployed - those persons who, for an entire week, did not work at all, were able to work and available for work, and (1) were looking for work or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new wage and salary job scheduled to start within the following 30 days (and were not in school during the week).
4. Unemployment Rate - the number of unemployed expressed as a percent of the civilian labor force.
5. Residence Data - a count of people by where people live.
6. Establishment Data - a count of jobs by where people work.
7. Seasonally Adjusted Labor Force Series - to facilitate the evaluation of the labor force, recurrent yearly movements have been isolated and removed using the X-12 ARIMA method of seasonal adjustment. This is the same method used by the Bureau of Labor Statistics to seasonally adjust the national labor force series.
8. MSA - Metropolitan Statistical Area - as determined by the Office of Management and Budget. The MSA must have a central city with a population of 50,000 or more.
9. LFA - Labor Force Area as determined by the Research and Analysis Bureau, Montana Department of Labor and Industry, consists of a central city or cities with a population of less than 50,000 and the economically integrated geographical area surrounding it.
10. LWIA - The enactment of the Workforce Investment Act (WIA) of 1998 is the first wholesale reform of the nation's job training system in more than 15 years. Montana's State Workforce Investment Board was created by the Governor in response to this Act and its first task was to certify the local workforce investment areas (LWIA), which are guided by local workforce investment boards (these local boards replaced JTPA's Private Industry Councils). The 2 LWIAs for Montana are known as Rural Concentrated Employment Program, or CEP (Beaverhead, Broadwater, Deer Lodge, Granite, Jefferson, Lewis & Clark, Madison, Meagher, Powell, and Silver Bow counties), and Balance of State (the other 46 counties).
11. BENCHMARKING - is a continuous process of establishing a new set of data which affects the series of estimates through revisions. Once a new benchmark is established, the adjustments to estimates between the new benchmark and the preceding one are carried forward progressively to the current month by use of sample trends. The benchmark is established less frequently (usually once a year) based on sample or secondary data. In the case of employment data, the benchmark is used to establish the level of employment, while the sample is primarily used to measure the month - to - month changes in the level.
12. CES-790 Program - current employment statistics survey produces monthly estimates of a wide variety of employment and earnings information for the nation and each state. Because this information comes from a survey of employers, persons who work for 2 different companies would be counted twice. Thus, nonagricultural employment is actually a count of the number of jobs filled, rather than the number of persons employed.

## Sources of data

S-1.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics (BLS). LAUS data (Local Area Unemployment Statistics program) is adjusted to the Current Population Survey benchmark and is the official BLS approved series that is used to allocate federal funds and determine eligibility for federal assistance programs. This series represents employment and unemployment by place of residence, and is not comparable to the place-of-work industry employment series (CES data). LAUS data is calculated for the week that includes the 12th of the month. Workers involved in labor disputes are counted as employed. Total employment in the labor force also includes agricultural workers, unpaid family workers, domestic workers and the self-employed.

S-2.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau. The unadjusted unemployment rate is prepared by the LAUS program in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics. The seasonally adjusted rate is an unofficial series, and is provided only for use as a state economic indicator.

S-3.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau from LAUS data. Data for Service Delivery Areas and Labor Force Areas is calculated from the official data series by summing up employment and unemployment for the appropriate counties involved, and calculating an unemployment rate from the summed data for each area.

S-4.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics. Data from the CES (Current Employment Statistics) program represents nonagricultural wage and salary employment by place of work, and covers full-time and part-time employees who worked during, or received pay for, the payroll period that includes the 12th of the month. The data excludes the self-employed, volunteers, unpaid family workers and domestic workers. Persons on sick leave, vacations, or holidays (and being paid for that period by their employer) are considered employed. Payroll and worker hour data is collected for production and related workers in manufacturing industries, nonsupervisory workers in private service-producing industries, and construction workers in construction industries. The earnings figures are "gross" figures—that is, they reflect changes in wage rates, shift differentials and premium pay for overtime work. The hours figures relate to the hours for which pay was received, which is different from scheduled or standard work hours.

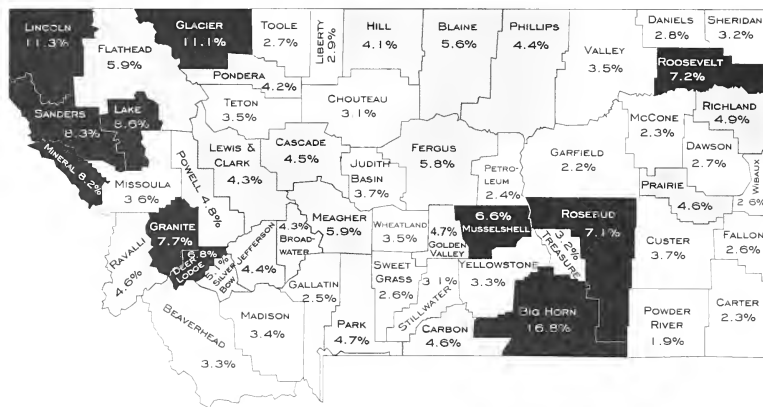

S-5.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau from a survey of Business Establishments as part of the BLS-790 Program. Information on female employment is computed as a ratio of all employees of the Current Employment Statistics, and is produced for informational purposes only.

S-6.) Tabulations produced by the U.S. Department of Labor's Bureau of Labor Statistics, and reprinted by the Montana Department of Labor and Industry's Research and Analysis Bureau for informational purposes only. This is a national data series because Montana data is not computed separately.

# Montana County Unemployment Rates - 2001 Annual Average\*

Statewide Average: 4.6%

National Average: 4.8%

Under 4.0%    4.0% - 6.5%    Above 6.5%
